

Our Deionizer System Just Got Even Better!

What could we do to make our Deionizer System even easier to install and use? Add a “No Guess Work” purity light and make it battery operated!

Improved Purity Light with Dual Color Light Indication
Green Flash = Cartridge OK
Red Flash = Replace Cartridge
No Light = Replace batteries or power problem.

2 Standard D-cell batteries will last for 2 years! Batteries are included!

Convenient Mounting of Deionizer System. No need to mount near AC Power Source. AC Plug is available, and sold separately. Part ID: PS-192

The improvements to our Deionizer will be available on March 19, 2007. After this date we will no longer supply the A/C powered single color purity light system.
